WORK EXPERIENCE

Cummins - Technical Program Manager

Aug 2026 – Dec 2026 | West Lafayette, IN

- Leading a 16-member cross-functional team across 3 AI use cases, running sprints, demos & research updates; automating data dictionaries & schema impact analysis on Snowflake Cortex across 350+ dbt ELT pipelines, targeting 80–90% cost savings.
- Driving delivery of a persistent memory framework (session, episodic, semantic) for a supply chain chatbot on LangGraph & Mosaic AI Vector Search, tracking eval milestones and compute risks in leadership reports; projected 30–40% faster agent development.

Trane Technologies - AI Product Intern

May 2026 – Aug 2026 | Davidson, NC

- Prioritized and roadmapped 21 GenAI use cases via value stream mapping across 6 sustainability workstreams; orchestrated delivery for 7 implementation plans including retrieval architecture, eval criteria, and AI guardrails; cut manual effort 86% (2,000+ hrs/year).
- Partnered with marketing to translate stakeholder & investor feedback into an LLM-powered competitor tracking system spanning 23 peers and 12 raters, collapsing month-long benchmarking into 1 hour including SWOT/gap analysis for competitive positioning.

ISE - AI Program & Data Associate

Jan 2026 – May 2026 | West Lafayette, IN

- Reached 100% fault detection and 75% expert agreement across 200+ industrial assets by directing the ML lifecycle (labeling, training, statistical evaluation) of a fault-classification system combining CNN, digital twin, and signal processing.
- Compressed inspection time 95% (5 hours to 15 minutes) across 3 live production deployments and presented a \$76K annual savings ROI business case to C-suite leadership.

Carrier - Product Owner

Aug 2022 – Dec 2025 | Hyderabad, India

- Owned end-to-end SDLC of STRAT, an AWS platform modeling financial/regulatory scenarios from SAP ERP and Snowflake; aligned sales, engineering & design by mapping stakeholder workflows, saving \$770K and driving 12x throughput on a \$20B portfolio.
- Defined requirements and acceptance criteria for AWS ETL pipelines (EC2, S3, Lambda, Docker) preserving data integrity and lineage across Snowflake and other sources, eliminating 4 critical bottlenecks and cutting processing time from 11 weeks to 4.
- Award: Youngest recipient of Carrier's Leadership Award (Top 1%) for excellence in product delivery.

Engineering Leadership Program (ELP) Associate - Three global 8-month Rotations

- Scaled a residential ML pipeline (training & inference) from 50 to 9,000 networked ESP32 IoT edge devices by re-platforming .NET to Python with concurrent processing on AWS EC2/S3, driving an 11% forecasting accuracy gain, 23% energy cost savings target.
- Quantified \$1.8M in at-risk assets and a 10% efficiency pathway by partnering with data scientists to profile 6+ months of 5-min DCIM telemetry across 16 rooms in 4 data centers (SHI, RCI, beta-index) via a cloud-deployed Plotly Dash dashboard.

PROJECTS

Bayer - Go-to-Market Strategy for LoriComunica (AAC App)

Jan 2026 – May 2026

- Led competitor analysis, A/B testing, and pricing strategy, driving a B2B/B2G go-to-market shift; new prototype adopted by 6 clinics, with 95% of users preferring it over the existing app.

Sentinel - AI Market Intelligence Platform | Personal Project

Jul 2026 – Present

- Engineering a market intelligence engine (n8n, Claude API, multi-agent via MCP) automating competitive intelligence and secondary market research, replacing manual company research with ranked, RAG-verified ICP matching to inform strategic planning.

Grandmode - Consumer Practice App for Older Adults

Sep 2026 – Present

- Conducted 10 user interviews with older adults (ages 69–75) on everyday consumer app use, synthesizing insights via affinity & customer journey mapping into 2 core jobs-to-be-done; ideated 60+ solution concepts across UX, fraud prevention & authentication.

Lodge - 1st Place, MEMPC Hackathon Finals 2026 (Top 7 Colleges incl. Duke, Cornell) [Link](#)

Apr 2026

- Shipped a production-ready behavioral matching engine from ideation to launch in 48 hours using Claude Code and Cursor, pairing 50+ live users on routine proximity and using the GPT-4.1 mini API to flag disengagement.

EDUCATION

Purdue University - Master of Engineering Management (Tech MBA), **GPA: 4.0**

West Lafayette, IN | Jan 2026 – Dec 2027

JNTU Hyderabad - Bachelor of Technology, Computer Science, **GPA: 3.9**

Hyderabad, India | Jul 2018 – Jul 2022

Relevant Coursework: New Product Development, Machine Learning & its Applications, Entrepreneurship, Technical Consulting

Leadership: Purdue Product Management Club, Women in Consulting, ASEM, Purdue Hacks, ISTE

SKILLS

Program & Product Delivery: Technical program management, cross-functional leadership, risk & dependency management, release & sprint planning, milestone tracking, Agile/Scrum, Jira, backlog prioritization, value stream mapping, process improvement, product strategy, roadmapping, requirements gathering, stakeholder workflow mapping, PRDs, rapid prototyping (Figma, Stitch), business case & ROI analysis

AI & Automation: AI agents, multi-agent systems, LLM APIs (Anthropic, OpenAI), prompt engineering, RAG pipelines, MCP, LangChain, LangGraph, n8n, workflow automation, internal tools, LLM evaluation, responsible AI & guardrails, Claude Code, Cursor, Microsoft Copilot, Snowflake Cortex, Mosaic AI Vector Search

Data & Cloud: Python (Pandas), SQL, ETL/ELT, Snowflake, Databricks, AWS, Docker, SAP ERP data integration, Excel (Pivot Tables), Tableau, Power BI, Plotly Dash, PostHog, data visualization, executive dashboards, product analytics, funnel analysis, A/B testing

Business Strategy & Research: Competitive intelligence & benchmarking, SWOT/gap analysis, market sizing, pricing strategy, go-to-market strategy, value proposition design, ICP definition, user interviews, customer journey mapping, JTBD, qualitative & quantitative research
